Avinash Sahu

Full-Stack Software Developer | Hyderabad, India
avinashsahu1994@gmail.com | +91 9993419273 | linkedin.com/in/a-v-i-n-a-s-h

SUMMARY

Full-Stack Software Developer with 4 years of experience engineering high-performance web and desktop applications, cloud-operations platforms, and AI-driven workflow engines. Specialized in TypeScript, React, and Node.js, with hands-on expertise in building secure authentication systems, resilient real-time data pipelines, and custom rich-text editors. Experienced in integrating enterprise cloud ecosystems (AWS, Azure) and third-party SaaS platforms (Jira, Slack, Linear) into unified, intuitive user interfaces. Proficient in AI-assisted development, using Claude Code to write code and test cases faster, and in building MCP (Model Context Protocol) integrations.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python
Frontend: React.js, Next.js, Zustand, Context API, Material-UI, Tailwind CSS, D3.js, HTML5, CSS3
Backend: Node.js, Express.js
Cloud & Infrastructure: AWS (Cognito, Lambda, DynamoDB, CloudWatch), GCP, Docker
Databases: MongoDB, DynamoDB, SurrealDB, SQL
Integrations & Tooling: OAuth 2.0, Jira, Linear, Slack, Git, GitHub
Fundamentals: Data Structures & Algorithms, Object-Oriented Programming

WORK EXPERIENCE

Full-Stack Developer — Oct 2025 – Present
Promptora.ai (Client: Tessell), Hyderabad, India

- **Desktop App Architecture:** Lead contributor to a cross-platform cloud-operations desktop app (Tauri, React, Rust), enabling automated AWS/Azure estate scanning, compliance audits, and AI-assisted playbook execution.
- **Authentication Library:** Built a reusable auth library for the desktop app that handles AWS Cognito and Google OAuth 2.0 sign-in, including the Google Cloud (GCP) project setup for the OAuth client, consent screen and redirect URIs, stores tokens securely, and brings users back into the app after they sign in through the browser.
- **Rich-Text Editor Systems:** Replaced legacy text inputs across all chat and document interfaces with a custom rich-text editor built on Lexical, standardizing Markdown parsing, lists, and context selection.
- **Execution & Scanning Orchestration:** Unified multi-cloud cost and inventory scanners into a single generic execution engine; built a dedicated Rust plugin for safe script execution with strict concurrency limits and safeguards.
- **Reliable Usage Analytics:** Rebuilt usage-analytics logging on AWS DynamoDB so no data is lost on unstable networks: records are saved offline, sent when the connection returns, and trimmed to fit storage limits.
- **Enterprise SaaS Integrations:** Built OAuth authentication, interactive ticket-creation workflows, and real-time alert readers for Jira Cloud, Linear, and Slack.
- **AI-Assisted Development:** Used Claude Code to write features, unit tests, and code reviews, and set up MCP (Model Context Protocol) integrations connecting AI assistants to Jira, Linear, Slack, and GitHub.
- **Data Provenance & Compliance:** Built indicators distinguishing real-time from cached cloud data, and automated compliance report templates for CIS AWS Benchmark, HIPAA, SOC 2, and PCI-DSS v4.0.

Software Developer — Mar 2024 – Oct 2025
Patdel Analytics, Mohali, India

- Built responsive, SEO-optimized web applications using Next.js, React, TypeScript, and Tailwind CSS.
- Engineered patent analysis and visualization platforms using D3.js, custom state hooks, and React Query caching.
- Configured AWS Cognito for authentication, Lambda for serverless workflows, and DynamoDB for storage; containerized with Docker for consistent local and deployment environments.
- Implemented internationalization (i18next) and automated PDF report generation from web views via Puppeteer.

Software Development Engineer 1 — Mar 2022 – Jun 2023
10x Academy, Remote, India

- Automated operations and mentor payout workflows using Python (Pandas) scripts and Looker Studio dashboards, reducing manual processing overhead by 80%.
- Built automated evaluation frameworks using Mocha and Chai to instantly validate student coding submissions.
- Developed a React-based progress tracker to visualize student learning milestones and improve platform retention.

ACHIEVEMENTS

- Ranked first overall in a company-wide hackathon at Tessell.

EDUCATION

M.Tech. in Computer Integrated Manufacturing — 2019 – 2021
National Institute of Technology (NIT), Warangal
